

Employee Relations | Leadership

Simply manage hazards and incidents well.

MySafetyEvents is designed for organisations and their staff to be able to access a simple yet effective hazard & incident reporting and management system at a reasonable price.

MySafetyEvents allows users to easily report workplace events or requirements including hazards, incidents, maintenance events and quality system requirements to allow the organisation to manage, correct and report against in real time. The essential functionality of MySafetyEvents at all levels of the organisation, including leaders and their team members, increases confidence that critical issues are able to be raised and managed within the appropriate timeframes.

Some of the key capabilities enabled by MySafetyEvents:

quick and effective reporting of:

- ⚠ hazards
- ⚠ safety related incidents
- ⚠ scheduled and reactive maintenance
- ⚠ quality system corrective actions
- ⚠ audit outcome corrective actions

corrective action management and responsible person reminders

real time tracking of all events and actions

injury tracking and record management

highly secure cloud based access
